Stay tuned for more exciting announcements over the coming months! Visit us at [www.therapytrack.com](http://www.therapytrack.com) to stay up to date on all our latest news.

## Secure Information with Therapy Track!

Therapy Track is a great addition to any therapy department, as we're sure many of you already know. With real time information and on-the-spot reporting, there's simply no better way to start measuring and improving your staff's performance.

And we're always working to add new features, reporting functions and tracking abilities to our program. But what about behind the scenes? There's a lot going on at our end that you probably never think about! Like our benchmarking activities that allow us to offer national standard information to our customers. And security is a big issue around here, too. We make sure that all your information is not only accessible to you, but as secure as possible. Here's some stats on how we're going the extra mile to protect our customers:

Our server facilities meet the most demanding requirements, with 3 Carrier Grade facilities and the highest level of security, safety, redundancy, reliability, scalability and technology –

### Special Building Features

- Lightning protection throughout the perimeter, rooftop, and electrical and mechanical support infrastructure
- Building strategically located outside of severe weather and seismic zones
- Building is rated to withstand hurricane force winds
- 24-hour physical security monitors all cameras, door positions, and badge access areas
- Redundant off-site monitoring of all security systems

### General Data Center Information

- 24 inch raised floor provides conditioned air from below to push hot air up for more efficient and effective cooling of computer equipment
- Additional water and weather resistance for further waterproofing
- Grounding connections on all posts, cages, and cabinets

### Electrical

- Redundant utility feeds and transformers
- Redundant main switch panels, each able to take full data center load and automated to fail over instantly if one shuts down to avoid downtime

And that's just the tip of the iceberg! If you have any questions at all about our super-secure servers, feel free to let us know! In the meantime, you can rest comfortably knowing your information is secure and waiting for you when you need it.

*the power of real time information!*
