

TOTAL
PRODUCTIVITY

TRACK

*Helping hospitals
“get a handle”
on productivity!*

TOTAL PRODUCTIVITY TRACK

Total Productivity Track is an internet-based program that helps hospitals track and optimize productivity **for all ancillary and nursing employees.***

*Total Productivity Track currently tracks all ancillary employees. We anticipate nursing coming online in late 2009.

TOTAL PRODUCTIVITY TRACK

Ancillary Services are the backbone of any hospital's overall patient care.

From Physical Therapy to Pulmonary to Radiology, **Total Productivity Track** works with all **Ancillary Service** professionals...

Pharmacy Techs
and more!

TOTAL PRODUCTIVITY TRACK

Hospitals across the country are looking at staff productivity as one avenue to **lowering the costs of healthcare.**

Ancillary staff members need to be held accountable for their daily productivity in order for the hospital **to achieve the correct cost for providing these services.**

Total Productivity Track:

- helps hospitals lower their cost to deliver healthcare
- tracks the daily activities of each individual in the ancillary departments, recognizing productivity issues and performances
- requires no large upfront purchase price – hospitals pay as they use the program
- offers a high ROI for hospitals

TOTAL PRODUCTIVITY TRACK

Power of Total Productivity Track:

- Staff involvement is key
- Daily self-management by employees
- Meeting individual targets leads to overall department productivity

TOTAL PRODUCTIVITY TRACK

Total Productivity Track measures each Ancillary employee on a daily basis:

Daily measurements and month-to-date awareness of their productivity targets vs. actual performance.

The result is **quality care at the lowest cost** to the hospital, with each employee giving a full day's work for a full day's salary.

TOTAL PRODUCTIVITY TRACK

Therapy Track, LLC is the ONLY company endorsed by the VHA and major hospital associations in Indiana, Kentucky, Ohio, Oklahoma, Michigan, Tennessee and Texas that helps hospitals focus on operations and financial workflow enhancement for Ancillary Services.

- Optimizes patient throughput
- Minimizes redundant or inefficient activities
- Maximizes billing by ranking the provider's activity-based billability

TOTAL PRODUCTIVITY TRACK

Total Productivity Track Predicts the Future!
Well, not exactly... but we are:

- A **predictive staffing tool** that assures labor savings through productivity improvements.
- An **ongoing service** – not a one-time fix. And our “Black Box” of data from the past 5 years can show you how you rate nationally.
- A **low cost, easy to use** productivity tool that is unmatched in the marketplace!

Some technical info on us:

- TPT is an application service provider (ASP) of a product dedicated solely to medical professionals.
- We use software technology to deliver web-based tools that function like customer's local software.
- By using low cost, user-owned terminals, users have access to integrated documentation of completed treatment data, individual target information, staff scheduling statistics and additional information on other therapist activities.
- The software is completely customized to the needs and goals of each healthcare client.
- All data is confidential and secure – our server meets all HIPAA Guidelines and Standards.

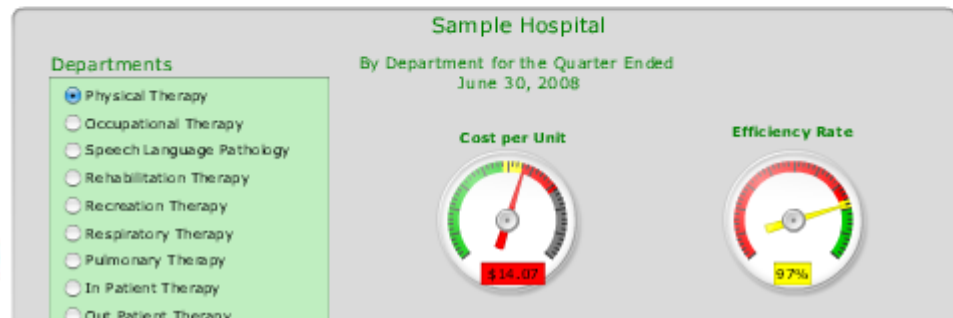

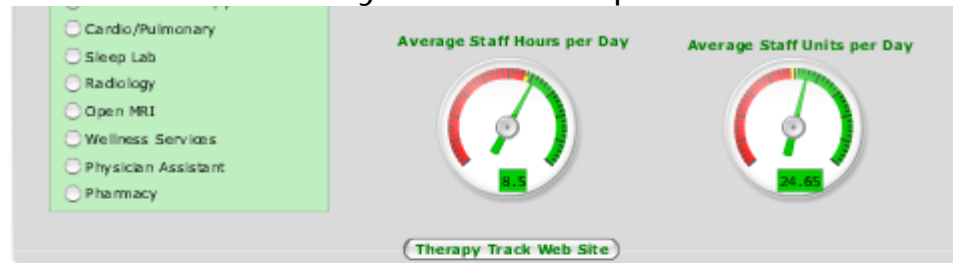

TOTAL PRODUCTIVITY TRACK

Dashboard Report

There are many real time reports and graphs available for department managers with TPT. In addition, administration receives a quarterly dashboard report that gives an instant look at each Ancillary Service department.

The dashboard report includes things like Efficiency Rates, Cost per Unit, and more.
